

MUHAMMAD JOBAYER HOSSAN

Flutter Engineer, Mobile and Cross-Platform, SaaS and AI Specialist

Tanta, Egypt Address Mobile: +20 150 326 2668 Address Email: hossanjobayer2021@gmail.com

LinkedIn: linkedin.com/in/muhammad-jobayer-hossan-267687222

GitHub: github.com/jabrinnalaa Address Portfolio: jabrinnalaa.github.io

Positioning: Seeking Flutter Engineer roles focused on cross-platform application architectures, enterprise SaaS systems, and conversational AI solutions.

PROFESSIONAL SUMMARY

Flutter Engineer with 4+ years of experience architecting and building high-performance cross-platform mobile, web, and desktop applications, AI-integrated features, and multi-tenant SaaS platforms. Expert in Dart, Firebase, and Node.js with deep specialization in Clean Architecture, state management, real-time sync systems, and offline-first design. Demonstrated history reducing app crash rates by 45%, improving load times by 40%, and increasing conversions by 22% through clean code practices, engineering optimization, and custom automations.

CAREER HIGHLIGHTS

- Built 3 production cross-platform SaaS systems (ERP, POS, CRM) serving 100K+ combined active users.
- Led AI chatbot and NLP workflow automations for mobile apps, reducing support load by 80% and response time by 60%.
- Designed robust offline-first sync architectures enabling seamless field operations in zero-connectivity environments.
- Published open-source tools on pub.dev, contributing actively to the global Flutter developer community.

TECHNICAL SKILLS AND COMPETENCIES

Mobile and Frameworks: Flutter 3.x, Dart, Android SDK, iOS SDK, Flutter Web, Flutter Desktop, Platform Channels, FFI, Adaptive UI

State Management: BLoC, Riverpod, Provider, GetX, Cubit, ChangeNotifier

Architecture and Backend: Clean Architecture, MVVM, Multi-Tenancy, Role-Based Access Control (RBAC), Firebase, Node.js, REST, GraphQL

Databases and Sync: Firestore, MongoDB, MS SQL Server, Redis, SQLite, Offline-First Sync, Atomic Operations

AI and Location Tools: Dialogflow, OpenAI API, NLP Integration, Google Maps SDK, GeoHashing, Geofencing, Background Location

DevOps and Testing: GitHub Actions, Fastlane, CI/CD, Unit Testing, Widget Testing, Integration Testing, Mockito, App Store Connect, Play Console

PROFESSIONAL EXPERIENCE

Lead Flutter Developer - Taghleef Tech (On-site, Full-time)

Jun 2025 - Present

Key Achievements: Leading cross-platform mobile architecture for industrial IoT, Unified Android, iOS and Web codebase

- Architecting production cross-platform Flutter applications for industrial packaging workflows, maximizing logic reuse via a unified codebase.
- Implementing Clean Architecture with Riverpod to deliver a highly modular, testable foundation with 90%+ cross-platform code sharing.
- Integrating real-time hardware device communication protocols with Flutter frontend for live production monitoring dashboards.
- Optimizing application performance, reducing startup latencies and memory usage through strategic platform-specific isolate management.

Flutter and SaaS Developer - RootX Softwares (Remote, Part-time)

Aug 2025 - Present

Key Achievements: Building multi-tenant cross-platform SaaS modules, AI feature integration for enterprise clients

- Developing modular cross-platform components for an enterprise SaaS ecosystem leveraging Flutter, Firebase, and Node.js microservices.
- Enforcing secure role-based access control (RBAC) and robust multi-tenant data isolation layers for B2B mobile customer onboarding.
- Integrating AI-powered chatbot solutions and automation workflows into current core products to boost enterprise user retention.

Flutter Developer - Smart Code (Tanta, Egypt, Full-time)

Feb 2023 - Aug 2025

Key Achievements: Employee of the Year 2024, 5+ Production Apps, 100K+ Users, 22% Conversion Lift

- Engineered 5+ production-grade cross-platform apps; achieved a 40% reduction in user authentication latency via optimized Firebase configurations.
- Connected legacy Microsoft SQL Server environments to mobile interfaces, slashing operational data latency by 65% for field engineers.
- Designed a custom conversational AI assistant (Dialogflow + OpenAI) resolving 80% of support queries automatically under 30 seconds.
- Configured automated mobile deployment pipelines using Fastlane and GitHub Actions, speeding up release cycles by 50%.

SELECTED PROJECTS

- V8 Alpha - Enterprise Multi-Tenant ERP and Accounting SaaS

Lead Full-Stack Engineer

- Architected an enterprise multi-brand platform with absolute data isolation across 15+ central modules.
 - Result: Zero overselling incidents and less than 0.01% financial variance across 50K+ mobile orders over the initial 3 months.

Link: [github.com/jabrinnalaa/v8-alpha](#)
- Restora - Restaurant Management SaaS Platform

Founder and Lead Developer

- Built a cross-platform restaurant ERP/POS supporting granular RBAC matrices across web and mobile layouts.
 - Integrated web-based QR digital menus and offline PDF reporting, reducing menu update intervals down to seconds.

Links: [github.com/jabrinnalaa/restora](#) | [jabrinnalaa.github.io/restora](#)
- PostMap - Real-Time Delivery and Logistics Tracking Engine

Lead Developer

- Designed serverless tracking telemetry handling location streams without heavy backend infrastructure via GeoHashing.
 - Engineered tamper-evident offline proof-of-delivery flows utilizing encrypted local persistence and automated syncs.

Links: [github.com/jabrinnalaa/postmap](#) | [jabrinnalaa.github.io/postmap](#)
- Easy Hishab - Multi-Tenant Business SaaS App

Lead Mobile Developer

- Architected multi-brand structural isolation profiles using secure Firebase Firestore rule definitions.
 - Engineered offline-first transaction logging dashboards, enabling seamless mobile point-of-sale functionality for vendors.

Link: [github.com/jabrinnalaa/easy-hishab](#)
- AI Customer Support and Sales Chatbot - Cross-Platform Smart Interface

AI Integration Lead

- Built a multilingual interface managing automated e-commerce CRM syncs, product queries, and order lookups.
 - Automated 80% of customer inquiries via mobile chat, scaling service capacity 5x without additional headcount.

Link: [github.com/jabrinnalaa/ai-chatbot](#)
- ERP Mobile Solution - Enterprise Management Application

Core Contributor

- Developed sales, HR, and finance modules with dynamic visual data dashboard updates powered by safe BLoC core state flows.
 - Boosted operational on-the-go productivity metrics by 75% for corporate field teams using real-time enterprise insights.

- Brain Arena - Interactive Puzzle Game

Independent Developer

- Built an engaging brain-training puzzle game with rewarded ad models, achieving a 4.5 star rating and 10K+ store downloads.
 - Optimized performance to reach consistent, fluid 60 FPS mobile graphics engine execution for iOS and Android.

EDUCATION

Bachelor of Science in Software Engineering
[Lakshmipur Government University](#)
Graduated: 2024

LANGUAGES

English (Professional) - Arabic (Intermediate) - Bengali (Native)

CERTIFICATIONS AND TRAINING

- * Google Cloud Digital Leader - Google - 2024
- * Google Associate Cloud Engineer - Google - 2025
- * AWS Cloud Practitioner - Amazon Web Services - 2024
- * Firebase Certified Developer - Google - 2023
- * MongoDB Data Modeling - MongoDB University - 2024
- * IBM Microservices Fundamentals - Coursera - 2023
